

Configurazione Server Cartelle Utenti e permessi

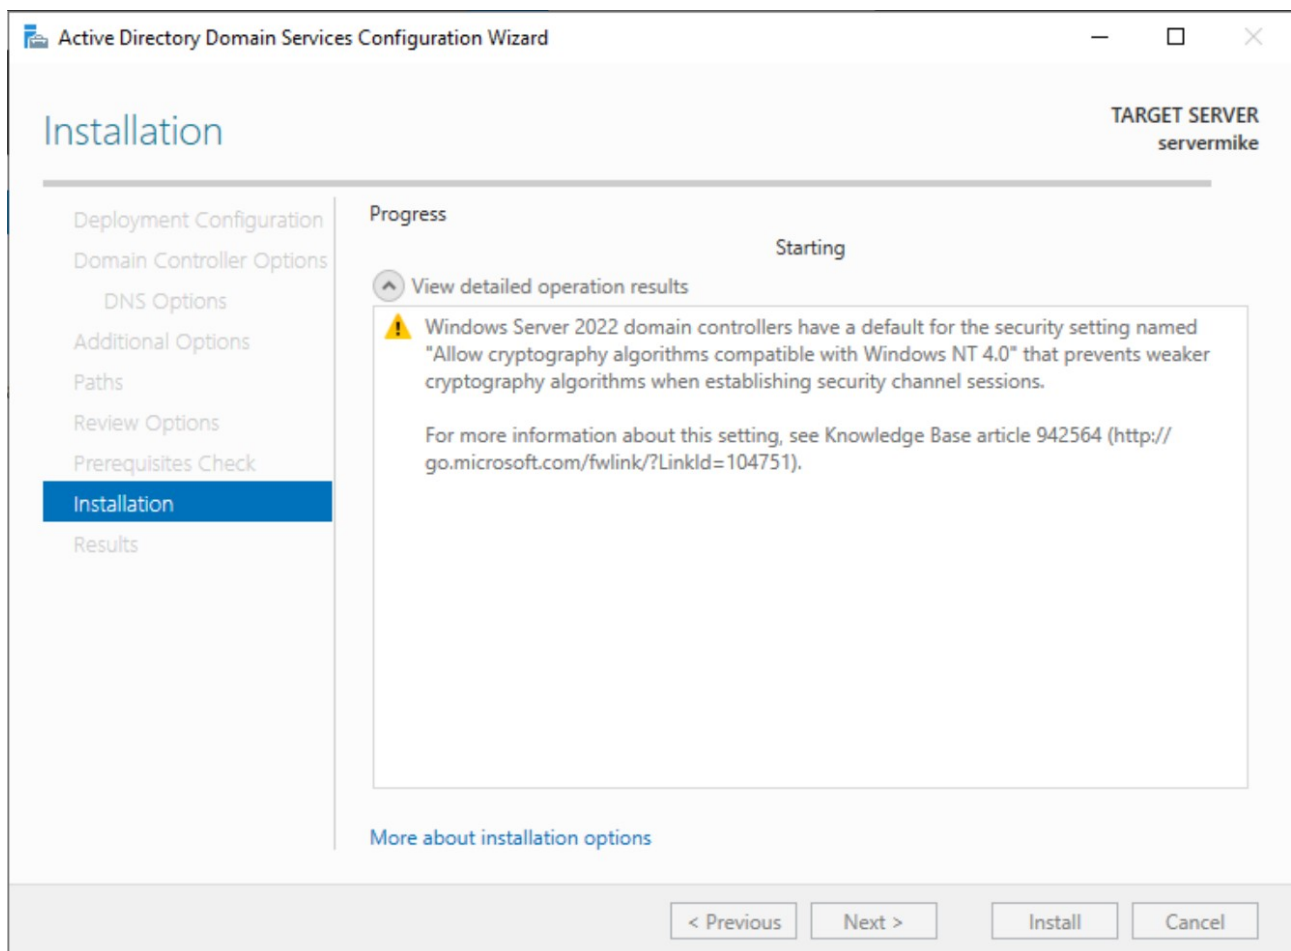

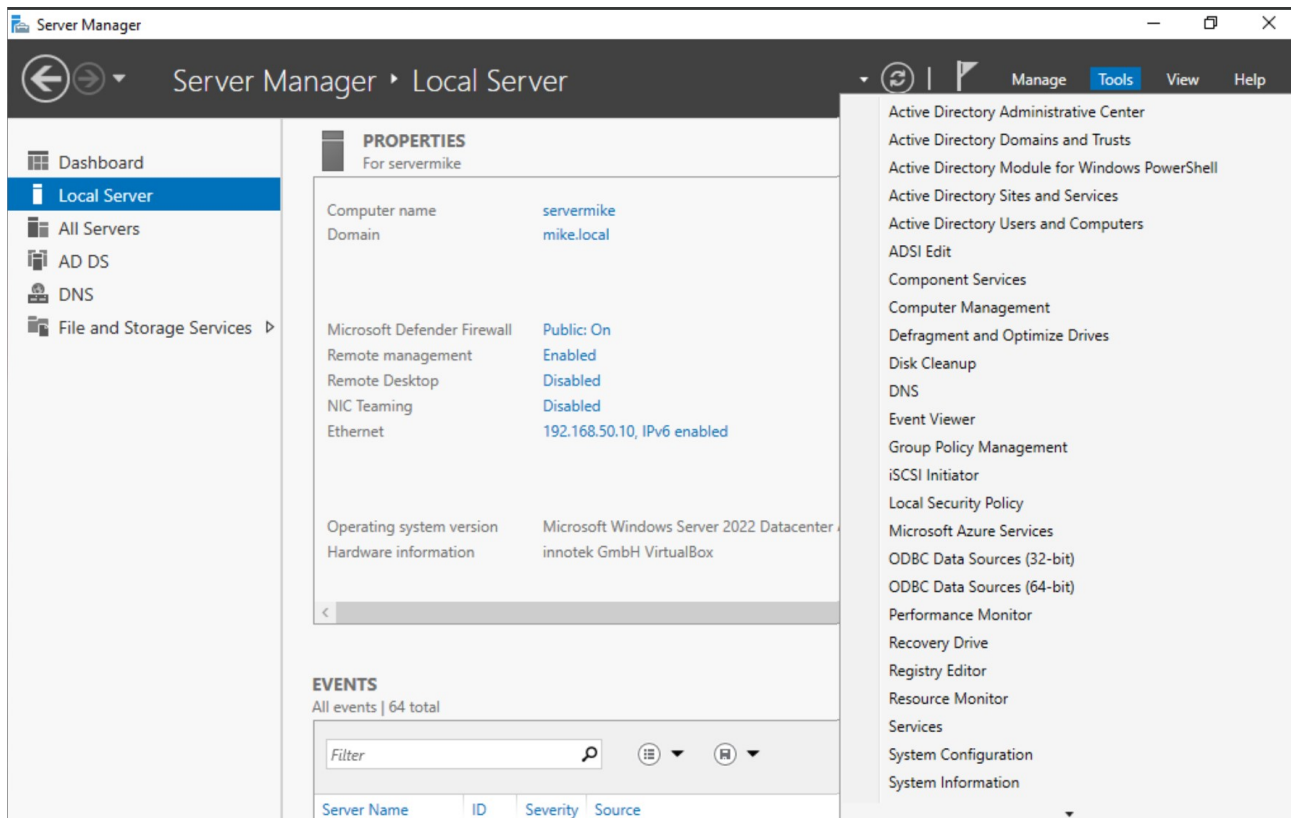

Per prima cosa cambiamo il nome del server

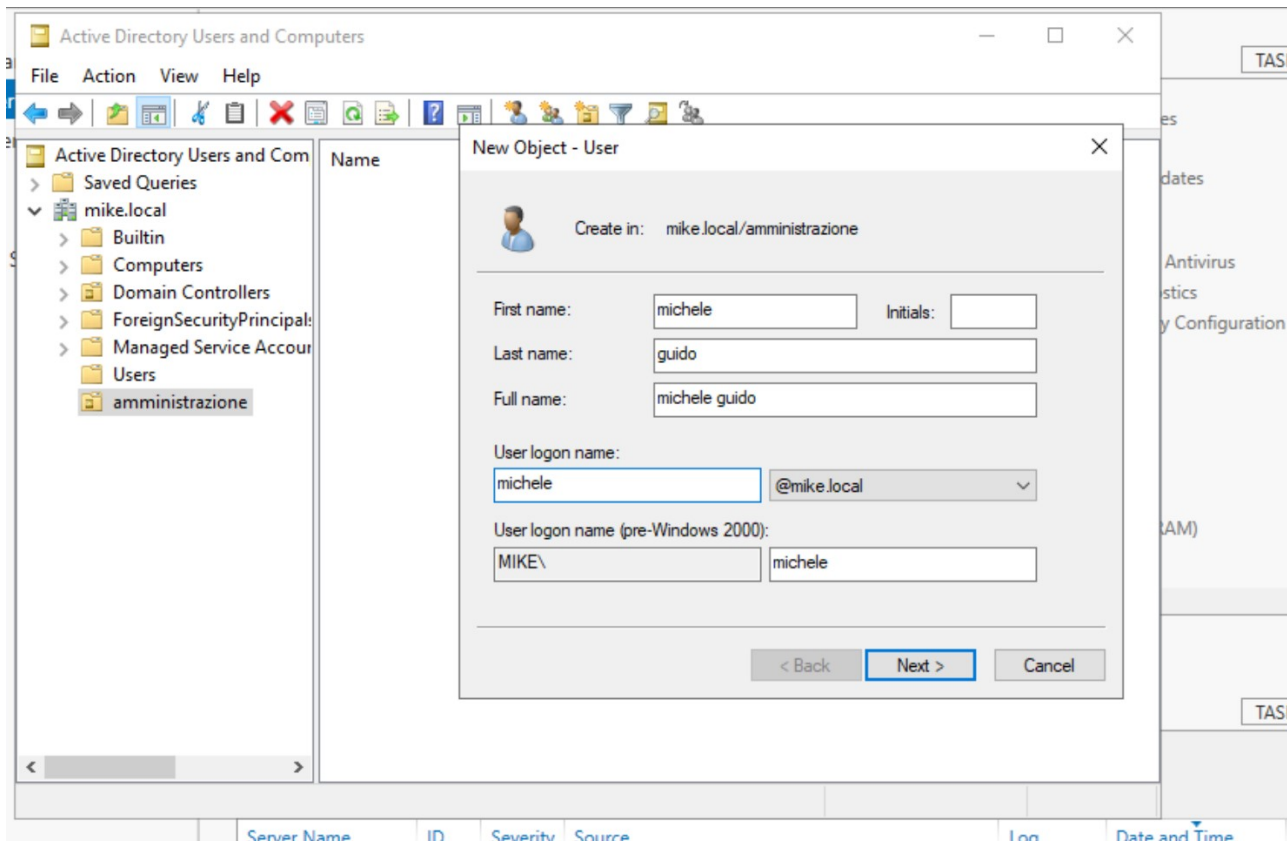

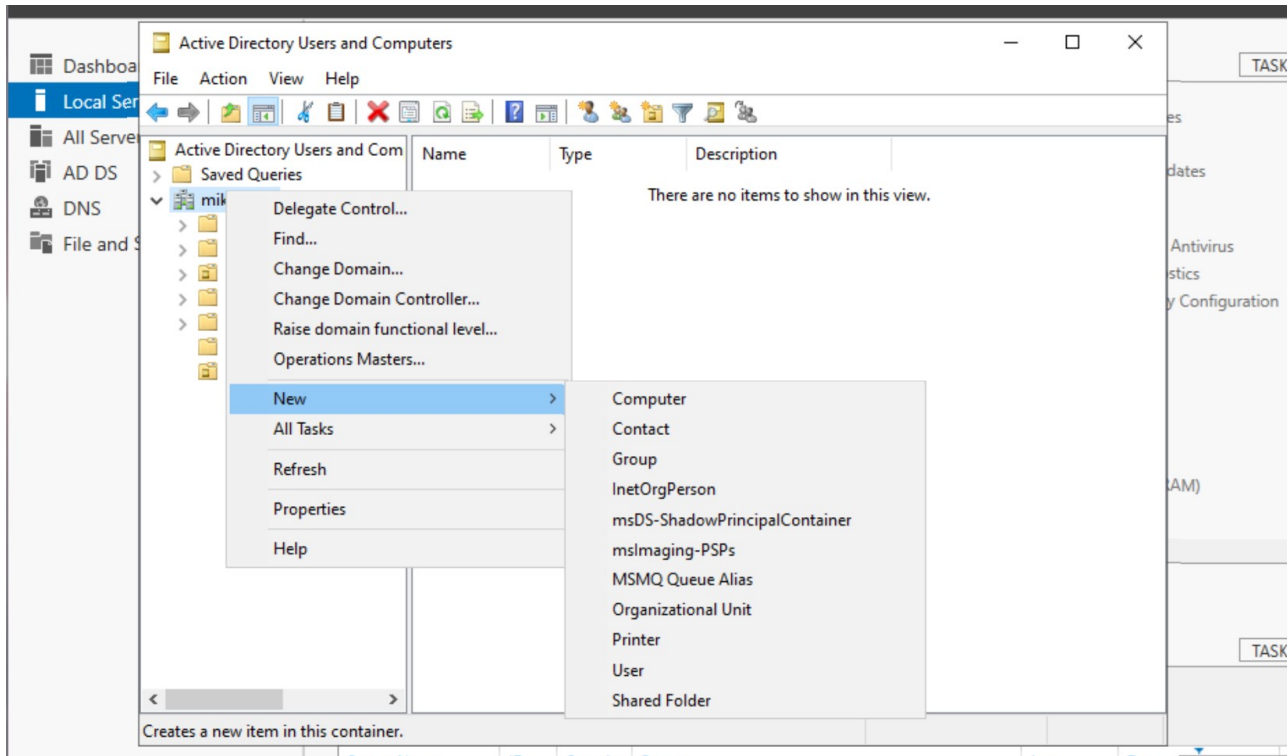

Creazione dominio

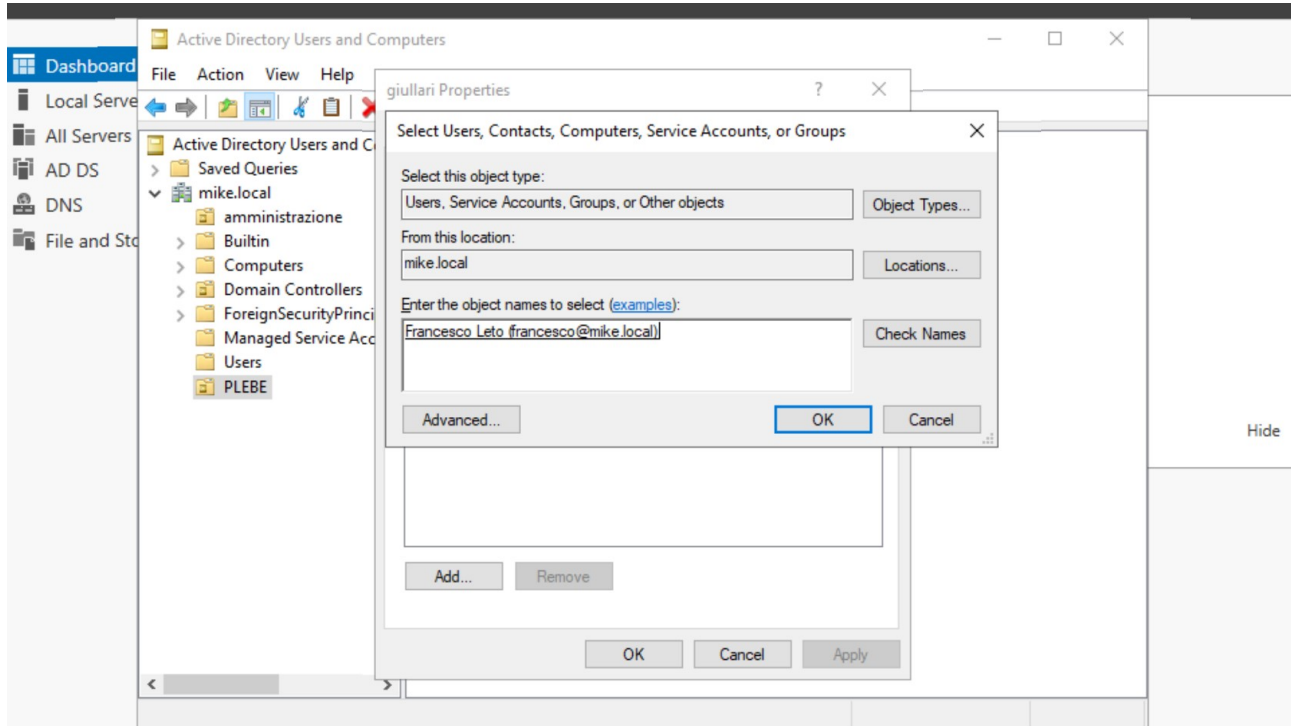

Dopo aver riavviato il server andiamo in manage e selezioniamo Add Roles and Feature e
proseguiamo con l'installazione

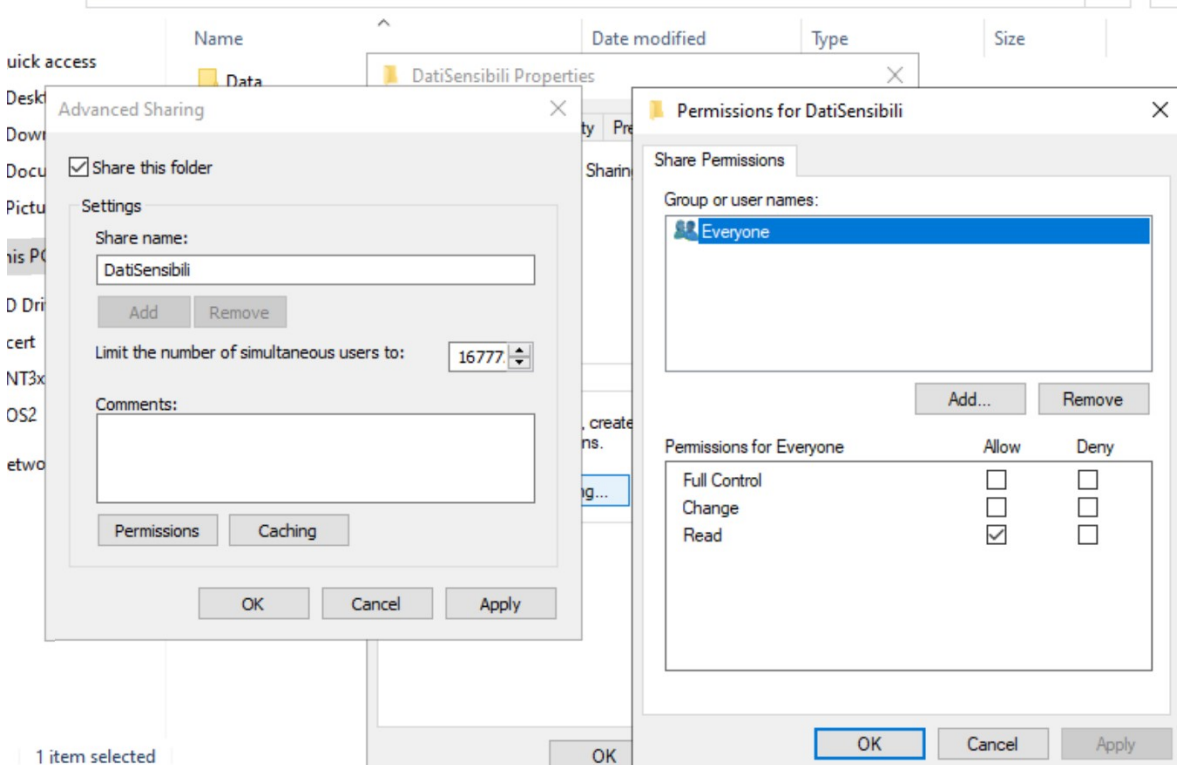

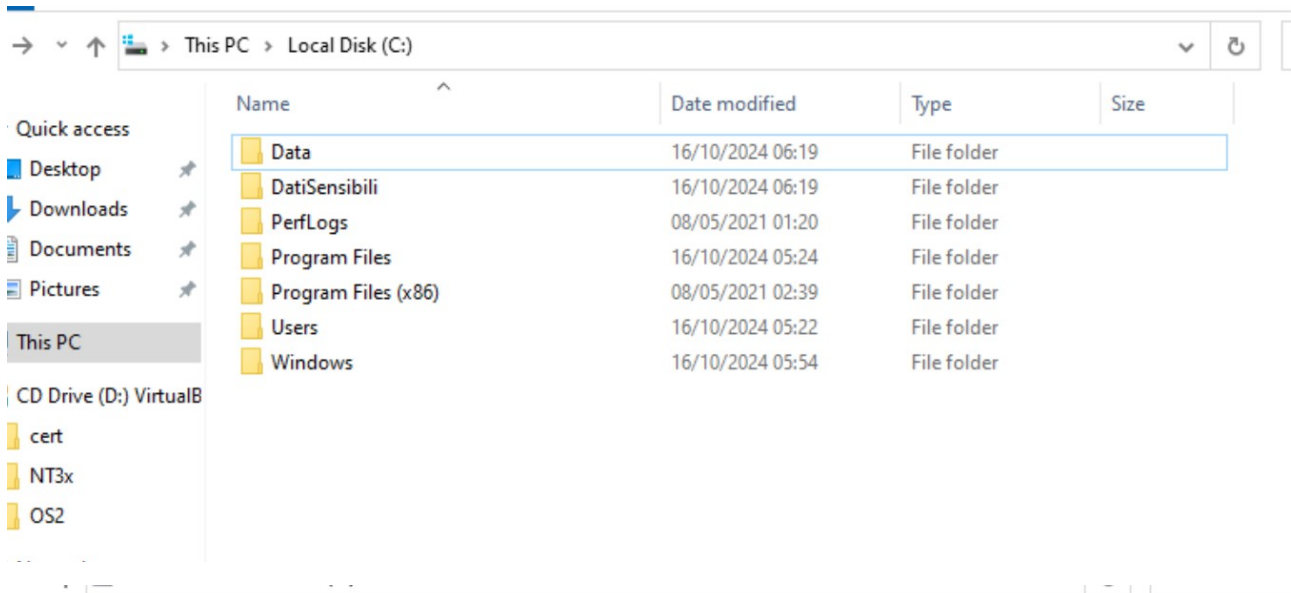

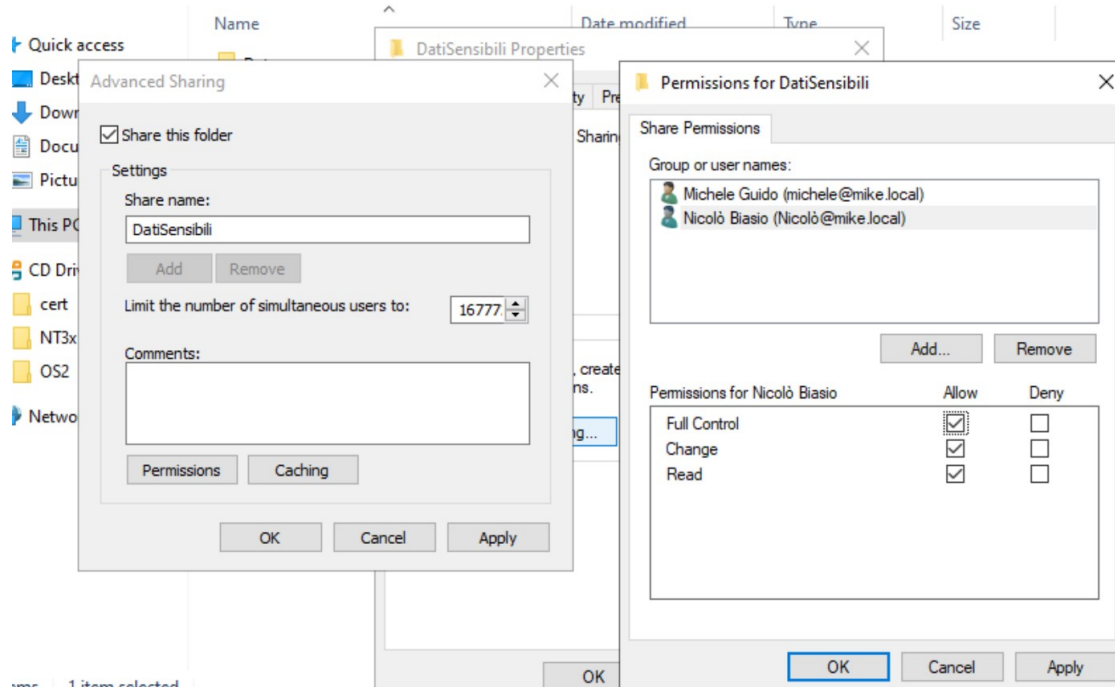

Creazione directory (amministrazione e plebe) dove inseriremo gruppi ed utenti

Creazione cartelle condivise (Dati sensibili e Data) e permessi

Terminati questi passaggi ci spostiamo sul client e cambiamo il dominio

Inseriamo un utente valido creato in precedenza

Riavviamo il pc andiamo in file explorer e su rete troviamo il nostro server con le cartelle condivise

A questo punto verifichiamo i permessi dei vari utenti
